Education

Rensselaer Polytechnic Institute, Troy, NY

August 2021 – Current

Mechanical Engineering Ph.D. Student

GPA 4.0

- Candidacy date: expected August 2024
- Focus: controls and machine learning for symbiotic autonomy and autonomous systems; human-machine interaction; controls for complex systems
- Relevant coursework: Systems Analysis Techniques; Nonlinear Control; Optimal Control; Multivariable Control; Introduction to Spacecraft Navigation; System Identification: Machine Learning from Data; Machine Learning for Autonomy; Machine Learning for Autonomy; Safe Autonomy; Perception & Action.

University of Texas at Austin School of Law, Austin, TX

2010-2013

Juris Doctor

GPA 3.14

- Focus: Litigation; intellectual property law; human rights law

Texas A&M University, College Station, TX

2006-2010

B.A. in Physics with Mathematics and Women's Studies minors

GPA 3.56

- Relevant coursework: Linear Algebra; Differential Equations; Partial Differential Equations; Computational Physics; Advanced Mechanics; Statics & Particle Dynamics; Quantum Mechanics; Principles of Electrical Engineering

Research Experience

Rensselaer Polytechnic Institute

August 2021 – Present

Graduate Research Assistant

Troy, NY

- Research focuses on dynamical system modeling for symbiotic autonomy systems.
- Supervise and mentor master's and undergraduate researchers.

Publications and presentations include:

- "Analysis of human steering behavior differences in human-in-control and autonomy-in-control driving." 2024 IFAC Workshop on Cyber-Physical Human Systems (under review).
- "A Queueing Theory Approach to Pilot-Controller Coordination for m:N Operations." 2025 AIAA SciTech (under review).
- "Generalized two-point visual control model of human steering for accurate state estimation." 2024 Modeling, Estimation, and Control Conference (under review)
- "Human-as-advisor in the loop for autonomous lane keeping" - 2023 American Controls Conference
- Building a pipeline for large language model fine-tuning, with a semantic search application - August 2023 Presentation to Ames Research Center, Moffett Field, CA
- Patents, IP Litigation, and Entrepreneurship - March 2023 Presentation to University of Kentucky Paducah
- Human-as-Advisor for Human-in-the-Loop Control - August 2022 Presentation to Army Research Laboratory Humans in Complex Systems Group, Aberdeen, Maryland

Teaching Experience

Rensselaer Polytechnic Institute

Graduate Teaching Assistant, Mechatronics

August 2023-May 2024

- Overall rating: 4.81/5 (Spring 2024) and 4.50/5 (Fall 2023)
- Used a group learning format to help ensure students learned to work together and tackle higher-level problems with less direction.
- Prepared physical and written materials for interactive lecture assignments.
- Revised and updated labs and other assignments for clarity, including adding key takeaways from each lab to guide student progress.
- Revised the assignment structure for the second project, magnetic levitation, to follow the engineering design process and help guide students through solving the problem themselves, rather than with explicit direction.
- Graded assignments, projects, and other items quickly and fairly, meeting tight deadlines to notify students in danger of failing the course.

Graduate Teaching Assistant, Modeling & Control of Dynamic Systems

August-December 2022

- Overall rating: 4.26/5
- Built a core group of students who attended nearly every office hour each week.

- Helped students learn via lecture-style problem solving, guiding individual solutions, and forming homework groups to build a community of students.
- Coordinated immediate grading of over 150 exams, with 2 day turnaround for final grades.

New Visions STEM

Guest Lecturer

August 2021-present

- Help revise electric car project to include motor modeling and feedback and feedforward controls, including providing lectures explaining basic control theory at a high school level.
- Develop content for several core lessons in the government and engineering domains. Illustrative lessons listed below.
- Intellectual Property Rights, IP Litigation, Economics, and Innovation - core lesson on the intersection of engineering and government.
- Introduction to reinforcement learning - developed an interactive lecture to introduce the basic concepts of reinforcement learning for high school students, and a physics exercise that simulates reinforcement learning and cements the concepts for students.
- Academic ethics and responsible studying in the age of ChatGPT - Socratic-style discussion about the nature of LLMs and the implications of their use on academic ethics, concluding with an exercise in simulated autoregression.

Engineering Experience

NASA Ames Research Center

January 2023 – Present

Pathways Intern - Digital Information Platform and Human-Autonomy Teaming Lab

Troy, NY

- Monitor human-autonomy teaming research for potential development and cross-collaboration, with an emphasis on disaster recovery and complex human-autonomy teaming scenarios.
- Develop large language model training and evaluation pipeline for future aviation-specific LLM development, including aviation-specific semantic search application to showcase training pipeline.
- Identify key areas for future NASA research on LLM development.
- Aid undergraduate interns in learning about LLMs, engineering projects, and professional communication.

Legal Experience

Weil, Gotshal & Manges LLP

May 2017 – December 2020

Patent Litigation Associate

Houston, TX

- Promoted a full year upon hire. The go-to attorney for technical analysis of electrical and mechanical technologies.
- Set and tracked deadlines for projects across multiple high-dollar value patent litigation cases.
- Worked with industry leaders and client experts to develop cohesive technical litigation strategies for Fortune 500 and Fortune 50 clients.
- Wrote winning briefs on case scheduling, discovery conflicts, patent interpretation, and expert testimony.
- Created successful persuasive technical presentations in diverse technologies, from high-speed modems to solar cells.

Pillsbury Winthrop Shaw Pittman LLP

July 2014 – May 2017

Patent Litigation Associate

San Diego, CA and Houston, TX

- Hired as a patent agent and quickly promoted to technical patent litigation attorney.
- Set and tracked deadlines across multiple cases for one of the firm's highest-value clients.
- Created educational slides that won a case by educating a judge on the difference between digital logic performed on binary numbers and arithmetic with real values.
- As a key member of the International Trade Commission (ITC) team, won an exclusion order for a Fortune 500 client, resulting in a key competitor being barred from importing products for sale in the United States.
- One of the youngest attorneys to sit second chair for expert witness questioning at trial.

Awards and Fellowships

- 2024-2025 Link Foundation Modeling, Simulation & Training Fellowship¹
- 2024 Boeing Summer Fellowship
- 2023-2024 Founder's Award of Excellence, Rensselaer Polytechnic Institute
- 2021-2022 NDSEG Honorable Mention, United States Department of Defense¹
- 2021-2022 SMART Scholarship Semi-Finalist¹
- 2021-2022 Rensselaer Graduate Fellowship, Rensselaer Polytechnic Institute
- 2011-2013 School of Law Scholarship, University of Texas at Austin School of Law
- 2010-2011 Endowed Presidential Scholarship in Law, University of Texas at Austin School of Law
- 2010 University Honors Certificate, Texas A&M University
- 2010 Foundation Honors Certificate, Texas A&M University
- 2006-2010 University Scholar, Texas A&M University
- 2006-2010 President's Endowed Scholar, Texas A&M University

¹National awards

Technical Background

- Implementation and analysis of machine learning and reinforcement learning algorithms
- Modeling, analysis, and design of electrical and mechanical systems using MATLAB and Python
- Source code analysis and interpretation in MATLAB, Python, C, C++, Java, Fortran, and Assembly
- Analysis and interpretation of 3GPP, 3GPP2, IEEE, and IETF communication devices and standards
- Computer-aided design and additive manufacturing workflow
- Persuasive technical and non-technical writing and speaking

Leadership and Mentoring

Rensselaer Polytechnic Institute

Mechanical, Aerospace, and Nuclear Engineering (MANE) Student Advisory Committee Member *October 2023-present*

- Represent MANE students to the department faculty and staff.
- Provide student input on faculty hires, curriculum changes, and other department functions.
- Elicit feedback from students to inform input and feedback to department.

Middle States Accreditation Self-Study Committee Member *March 2023-present*

- Research and document the student experience at RPI for self-study accreditation report.
- Provide feedback and edits to self-study report.
- Interface with institute faculty and administration to facilitate self-study process.

Graduate women's mentoring circle founder; MANE Department *March 2022-present*

- Initiate and organize networking and professional development luncheons for women graduate students and faculty members in MANE department.
- Develop topics and foster discussion to provide mentoring to graduate students and junior faculty members.
- Coordinate future sessions, including potential guest speakers and joint events for other underserved groups and allies.

Society of Women Engineers Graduate Student Committee Secretary *October 2021-present*

- Selected for the national-level 2022-23 and 2023-24 **Academic Leadership for Women in Engineering** cohorts.
- Chosen to attend 2022 Annual Conference to represent university section.
- Dramatically increased graduate section engagement through recruiting events and outreach.
- Propose, organize, and plan events tailored to graduate student interests.
- Organize meeting agendas, take notes during meetings, and organize items for follow-up as needed.
- Update main Society of Women Engineers about graduate student events and coordinate between graduate committee and undergraduate activities.

New Visions STEM

Volunteer Tutor *August 2021-present*

- Develop curriculum to teach high school students how STEM fields interact with U.S. and international government, policy, and economics, including the use of laws and policy to promote STEM goals.
- Lead activities to teach students how policies are developed, implemented, and modified.
- Provide supplemental lectures and content about the economic and governmental incentives behind intellectual property rights, development, and protection, including proposed reforms.
- Individual and group tutoring on physics, engineering, scientific and persuasive writing, and presentation skills.

NASA Lucy Student Pathway Accelerator and Competency Enabler (L'SPACE)

NASA Proposal Writing and Evaluation Experience Academy *May-August 2022*

- Led a team of undergraduate students to propose a unique solution to astronaut hand injuries during EVA.
- Implemented NASA proposal review standards and procedures during proposal assessment phase.

Nidan, Shotokan Karate

Second Degree Black Belt *Achieved May 2021*

- Recognized by multiple worldwide organizations including SKIF, JKS, and JKA.
- Formal and informal mentoring and teaching of students from beginning to advanced levels in all age groups.

Interests

Formula 1 Racing | Martial Arts | 3D Printing and Design | Horseback Riding | Baking | Writing | Crochet
